

Case Study – UK's Automotive Giant

FACT SHEET

Organization

UK's Automotive Giant

Industry

Automotive

Scope

Integration

Technologies used

.NET and Microsoft Dynamics AX

Dynamics AX Tools

MorphX IDE, AIF Adapters

Application Type

ERP Software

Project Description

Design and Develop an Integrated Enterprise Solution with the help of Microsoft Dynamics AX, that standardizes workflow across 100 or more garages. This Integrated Solution assists or helps customer to monitor and control by Head Quarter.

The solution is compatible for Planning such as Appointment Booking, Work-Order Planning and Quotations and integrate with Admin planning activities such as Accounts Receivables/ Payables, GL and Product Information Management.

AIF Web services are used to integrate Appointment Booking, Work Order web application to Microsoft Dynamics AX. Dynamics AX ERP is used to maintain standard Financials.

The Solution is built on Microsoft Dynamics AX 2012 R2 and the target business users are above 200.

Total Team Size : 12

Project Status: COMPLETED

Value Added by EGS

- Suggested optimal integration solutions to reduce manual intervention to update the back end Financials
- Agile based Delivery Model
- ERP Functional Testing and System Integration Testing
- Prompt response to queries when requested
- Risk Mitigation plans
- Adherence to committed project schedule
- Adherence to Microsoft Dynamics best practices

Challenges

- Mapping of Integration entities
- Legacy application data import
- Infrastructure issues
- Tracking of entities
- Country specific activities
